

# CenturyLink®

## Department of Homeland Security (DHS)

# Intrusion Prevention Security Service (IPSS)

**CenturyLink's DHS Intrusion Prevention Security Service provides cyber threat protections** to federal government agencies and complements other CenturyLink managed security services, including Managed Trusted Internet Protocol Service (MTIPS). CenturyLink has been providing cyber security protections to the Defense Industrial Base (DIB) and critical infrastructure companies for over five years.

## Product Description

CenturyLink's DHS Intrusion Prevention Security Service provides advanced email and DNS security utilizing government-furnished threat and technical information.

## Key Features

CenturyLink's DHS Intrusion Prevention Security Service includes:

- Network-based inbound email filtering and neutralization
- DNS protection and notifications
- Advanced attack detection, prevention and mitigation
- Real time blocking, notifications and weekly reporting
- Multiple interface options to meet a variety of email implementations
- Evolving security services provide state-of-the-art protections not available in commercial offerings
- Traffic aggregation routes selected traffic through a secure facility and allows for detection and prevention of malicious traffic

CenturyLink offers federal government agencies innovative, cost-effective, digitization solutions, to support their mission needs and to help transform & modernize their IT networks.

Federal Solutions Group Headquarters: 4250 N. Fairfax Drive Arlington, VA 22203
